$\qquad$

1. Reading box plot. Find the median, quartile one, minimum, maximum, and quartile three.

2. Find the median, quartile one, quartile three, and interquartile range. Then create a box plot.
$12,9,7,17,13,4,2,6$

3. Create a histogram for the data.
$45,47,47,48,49,49,49,49,50,50$,
$50,50,50,50,50,51,51,51,52,52$

$5=7$. Determine if there are any outliers in the data set. Which measure of center would be most appropriate?
$23,43,33,21,19,34,37,40$
4. The dot plots represents what data set?

5. Create a dot plot for the data.

$$
45,47,47,48,49,49,49,49,50,50 \text {, }
$$

$$
50,50,50,50,50,51,51,51,52,52
$$

6. Determine if there are any outliers in the data set. Which measure of center would be most appropriate? $5,6,1,4,3,9,11,29,5$
8. Find the mean and the mean absolute deviation. $76,81,93,54,55,23,41$

| Gender | Favorite Animal |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Monkey | Zebra | Cat | Ant |
| Male | 36 | 52 | 21 | 2 |
| Female | 45 | 30 | 19 | 7 |

9. What is the joint frequency of females who like cats?
10. What is the marginal frequency of zebras?
11. What percent of males like monkeys?
12. What percent of students like zebras?

| Gender | Known Languages |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | English | Spanish | French | Latin |
| Male | 121 | 73 | 30 | 20 |
| Female | 117 | 91 | 22 | 14 |

13. What is the joint frequency of males who know French?
14. What is the marginal frequency of males?
15. What percent of students know French?

The following table comes from a survey of 100 hikers on the areas of hiking preferred. Complete the table.
Hiking Area Preference

| Gender | The Coastline | Near Lakes \& Streams | On Mountain Peaks | Total |
| :---: | :---: | :---: | :---: | :---: |
| Female | 22 | 17 |  | 45 |
| Male |  |  | 24 | 50 |
| Total |  | 37 |  |  |

16. What percent of people surveyed prefer to hike on mountain peaks?
17. What percent of females surveyed prefer to hike the coastline?
18. What is the probability that a male prefers to hike near lakes and streams?
19. What is the marginal probability of people who prefer to hike the coastline?
20. What percent of people who prefer to hike the coastline are female?
21. Write an equation that could be used to approximate the data in the scatter plot. Is the correlation; strong negative, strong positive, weak negative, or strong positive?

22. A data set has a correlation of -0.876 . What can be said about the data set?
23. Mike puts money in the bank every month. He can approximate the amount he saves using the function $f(x)=105 x+570$. What can be said about the y intercept?
24. Write an equation that could be used to approximate the data in the scatter plot. Is the correlation; strong negative, strong positive, weak negative, or strong positive?

25. A data set has a correlation of 0.342 . What can be said about the data set?
26. The growth of ivy can be estimated by the function $f(x)=4.5 x+13$. What can be said about the slope?
27. Which of the following variables would you expect there to be a negative correlation?

The longer the day, the higher the temperature. Or
As days get longer, nights get shorter.
28. Which of the following variables would you expect there to be a positive correlation?

The longer you live, the heavier you weigh.
Or
The longer you live, the less hair you have on your head.
29. Create a scatter plot for the data set below and find a line of best fit.

| $\mathbf{x}$ | $\mathbf{y}$ |
| :---: | :---: |
| 15 | 30 |
| 15 | 25 |
| 14 | 24 |
| 11 | 30 |
| 16 | 27 |
| 17 | 26 |
| 19 | 32 |
| 10 | 30 |
| 22 | 19 |

30. The data below represents the life expectancy of the population of the Unit States from 2001 to 2011, based on years of birth. Let the year 2001 be $\boldsymbol{x}=0$, and let $x$ represent the number of years since 2001.

| Year | 2001 | 2003 | 2005 | 2007 | 2009 | 2011 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Life exp. | 76.24 | 75.49 | 74.75 | 73.00 | 72.24 | 71.49 |

a) What is the best fitting linear line for the data?
b) Based on the data, what is the life expectancy for someone born in $\mathbf{2 0 2 0}$ ?
c) Why do you think the life expecrtancy is decreasing?
31. Below is a table that shows the amount of sugar (grams) left in your body after eating Chipotle. Answer the following questions about the data.

| Time (hours) | .5 | 1.5 | 2 | 3 | 3.75 | 5 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Sugar (grams) | 20.05 | 5.12 | 2.5 | 1.25 | 0.46 | 0.35 |

a) What is the best fitting exponential model for the data?
b) Based on the data, when will your sugar level be $\mathbf{4}$ grams?
32. The table below shows my income from ages 26-30. Use the data to answer the following questions.

| Age | 26 | 27 | 28 | 29 | 30 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Income (\$1000) | 16.8 | 19.1 | 23.3 | 25.8 | 33.9 |

A. Find a linear equation for the data.
B. What does the y-intercept mean?
C. What does the slope mean?
D. Using your equation, how much will I make when I'm 40 years old?
E. Determine how old I will be when I make $\$ 60,000$.
33. The dot plots represents what data set?

34. Which graph has a greater variation?
35. Which graph has a greater mean?
