

Name: _____

Block: _____

Vocabulary: Independent events, dependent events, conditional probability, Addition Rule, Multiplication Rule for Independent Events, outcome, overlapping events, union, intersection

Employment Survey Results

| Employment Status | Age (in Years) | | Total |
|-------------------|----------------|---------------|-------|
| | Less than 18 | 18 or greater | |
| Has Job | 20 | 587 | 607 |
| Does Not Have Job | 245 | 92 | 337 |
| Total | 265 | 679 | 944 |

5) Martin has 8 cards. What is the probability (as a percentage) of getting an even number or a 10?

Mutually exclusive or overlapping

6) You spin a spinner. What is the probability of spinning a 4 or landing on an odd number?

Mutually exclusive or overlapping

1) Find the probability that a randomly selected person will have a job, given they are older than 18. $P(\text{job} | \text{older than 18})$.

2) What is the probability that person has a job?

3) Find the $P(\text{Does not have a job and is less than 18})$

4) Find the probability that a randomly selected person has no job, given they are older than 18?

7) Find $P(A)=$

8) Find $P(B)=$

9) Find $P(B)'=$

10) Find $P(A \cup B)=$

11) Find $P(A \cap B)=$

12) Find $P(\overline{A \cap B})=$

13) You are guessing at two questions on a multiple-choice test. Each question has 4 answer choices. What is the probability you guess both questions correct?

Independent or dependent

14. There is 1 red goldfish and 4 yellow goldfish. You randomly choose two goldfish without replacement. What is the probability that the first fish is red and the second is gold?

Independent or dependent

15) Are the events independent?

$$P(A) = \frac{3}{10}; P(B) = \frac{3}{20};$$

$$P(A \cap B) = \frac{9}{200}$$

Independent or dependent

16) Are the events independent?

$$P(A) = 0.08; P(B) = 0.4;$$

$$P(A \cap B) = 0.12$$

Independent or dependent

| | Answers | | | | | | | | | | | | | | | | | | | | |
|--|-----------------|--------|--------|-------|-------|------|-----|-----|----|-------|--------|-----|-----|----|-------|-------|-------|-------|-----|-------|-----------------|
| <p>1) For which set of probabilities would event A and B be independent?</p> <p>A. $P(A) = 0.25, P(B) = 0.25; P(A \text{ and } B) = 0.50$ B. $P(A) = 0.08, P(B) = 0.40; P(A \text{ and } B) = 0.12$ C. $P(A) = 0.16, P(B) = 0.24; P(A \text{ and } B) = 0.32$ D. $P(A) = 0.10, P(B) = 0.30; P(A \text{ and } B) = 0.03$</p> | <p>1) _____</p> | | | | | | | | | | | | | | | | | | | | |
| <p>2) What is the probability that a randomly chosen person has blonde hair, given that the person selected is male?</p> <p style="text-align: center;">Hair Color</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th></th> <th>Brown</th> <th>Blonde</th> <th>Red</th> <th>Total</th> </tr> </thead> <tbody> <tr> <th>Male</th> <td>548</td> <td>876</td> <td>82</td> <td>1,506</td> </tr> <tr> <th>Female</th> <td>612</td> <td>716</td> <td>66</td> <td>1,394</td> </tr> <tr> <th>Total</th> <td>1,160</td> <td>1,592</td> <td>148</td> <td>2,900</td> </tr> </tbody> </table> <p>A. 0.51 B. 0.55 C. 0.58 D. 0.63</p> | | Brown | Blonde | Red | Total | Male | 548 | 876 | 82 | 1,506 | Female | 612 | 716 | 66 | 1,394 | Total | 1,160 | 1,592 | 148 | 2,900 | <p>2) _____</p> |
| | Brown | Blonde | Red | Total | | | | | | | | | | | | | | | | | |
| Male | 548 | 876 | 82 | 1,506 | | | | | | | | | | | | | | | | | |
| Female | 612 | 716 | 66 | 1,394 | | | | | | | | | | | | | | | | | |
| Total | 1,160 | 1,592 | 148 | 2,900 | | | | | | | | | | | | | | | | | |
| <p>3) When rolling a fair, six-sided number cube, what is the probability of rolling an even number or a number less than 3?</p> <p>A. $\frac{5}{6}$ B. $\frac{2}{3}$ C. $\frac{1}{2}$ D. $\frac{1}{3}$</p> | <p>3) _____</p> | | | | | | | | | | | | | | | | | | | | |
| <p>4) Each letter of the alphabet is written on separate cards in red ink. The cards are placed in a container. Each letter of the alphabet is also written on separate cards in black ink. The cards are placed in the same container. What is the probability that a card randomly selected from the container has a letter written in black ink or the letter is A or Z?</p> <p>A. $\frac{1}{27}$ B. $\frac{13}{13}$ C. $\frac{15}{26}$ D. $\frac{8}{13}$</p> | <p>4) _____</p> | | | | | | | | | | | | | | | | | | | | |

5) Ms. Klein surveyed 240 men and 285 women about their vehicles. Of those surveyed, 155 men and 70 women said they own a red vehicle. If a person is chosen at random from those surveyed, what is the probability of choosing a woman or a person who does NOT own a red vehicle?

5) _____

- A. $\frac{14}{57}$
- B. $\frac{71}{105}$
- C. $\frac{74}{105}$
- D. $\frac{88}{105}$

6) Bianca spins two spinners that have four equal sections numbered 1 through 4. If she spins a 4 on at least one spin, what is the probability that the sum of her two spins is an odd number?

6) _____

- A. $\frac{1}{4}$
- B. $\frac{7}{16}$
- C. $\frac{4}{7}$
- D. $\frac{11}{16}$

7) Assume that the following events are independent:

The probability that a high school senior will go to college is 0.72.

The probability that a high school senior will go to college and live on campus is 0.46

What is the probability that a high school senior will live on campus, given that the person will go to college?

7) _____

- A. 0.26
- B. 0.33
- C. 0.57
- D. 0.64

8) A student draws a card from a standard deck and then draws another card without replacing the first card. Explain why the probability of picking an ace on the first draw and the probability of picking a 7 on the second draw are NOT independent events.
